

Dear Student,

Open book examination is all about time management and selecting the right content from the given study material. Many of our friends commit the mistake of writing (copying) the whole content from the material without considering the valid points which ultimately kills the time. So we need to have patience. At the same time the greed to write more and more encompassing irrelevant points should be curbed.

This master index has been prepared with the help of the Institute’s study material (published on 2016-17 – printed mat). It is worth noting that the content table of the original mat does not cover the sub divisions of the topic which makes it difficult for a student to trace the exact answer from the book during the examination. Hence in order to reduce the effort and confusion of an aspirant this master index has been framed.

Kindly note that certain topic in the index does not contain page numbers. This is because those topics are included in the electronic mat available on the search engines and not been covered under the printed mat of the given published date. So it will be beneficial for you to cover those topics as well (bold or highlighted ones).

All the best!!

Lesson 1	
Economic Framework of Capital Market	
Particulars	Page no
Introduction	
Constituents of the financial system	2
Financial assets	
<u>Classification of Financial Assets</u>	
A. (i) Marketable assets (ii) Non-marketable assets	2
